Paris, December 1st, 2015

RENAULT TRUCKS DEFENSE OFFER THEIR MIDS PC FOR PURCHASE

The MIDS Command Post manufactured in the Renault Trucks Defense factories of Limoges and Fourchambault is now available for purchase.

Designed to provide police operations with C3I* support, MIDS CP is specially equipped with a rear compartment that includes 5 workstations connected to a 19-inch computer rack, a whiteboard, a large screen for teleconferences and information sharing, as well as ancillary equipment (interphone system, printer, refrigerator, coffee machine).

All the seats enable users to work on the move and the vehicle features an additional folding seat intended for a guest officer. On the roof, 7 cameras generate a close-perimeter situational awareness, while a 360° swivelling camera fitted onto a deployable mast ensures long-range observation.

Additionally, the front compartment is equipped with the *BattleNet Inside* mission system, on which the co-pilot can retrieve all the video flows, the vehicle's GPS location on a map of the area of use, as well as all the user documentation pertaining to the vehicle and its many appliances, in digital format.

This marks a double kick-off, as this is the first time a MIDS PC as well as a *BattleNet Inside* system are put on the market.

VOLVO GROUP GOVERNMENTAL SALES is in charge of Defense, Security activities and Emergency services within the Volvo Group, with the following brands: RENAULT TRUCKS Defense, ACMAT Defense, PANHARD Defense, VOLVO Defense and MACK Defense. VOLVO GROUP GOVERNMENTAL SALES is a leading player in the field of wheeled military and security vehicles.

RENAULT TRUCKS Defense, one of three participants in the Joint Venture (GME) which was awarded the Scorpion contract by the Minister of Defense on 5 December 2014, is to participate in the development of the French Army's new generation of front-line vehicles Griffon and Jaguar. RENAULT TRUCKS Defense is in particular responsible for supplying the powertrains for these two vehicles, and for providing the whole supply chain for the spare parts and components of the Scorpion program.
