The RTD VAB MARK 3, with 90 mm turret gun

RENAULT TRUCKS Defense will next week be presenting its VAB Mark 3 equipped with CMI 90 mm turret gun at the Eurosatory exhibition.

Developed using internal funding, and benefiting from 40 years of experience with the VAB range, this is a 20-tonne 6x6 equipped with a 340 - 400 hp engine and automatic gearbox, capable of speeds of up to 105 kph.

Transporting two crew members and six troop passengers in the 90 mm version presented, it is capable of taking part in infantry combat missions (support and reconnaissance, zone control) and benefits from ballistics and mine protection (Stanag 4569 NATO) meeting today's high standards of crew protection.

Its generous stock of 90 mm munitions makes it a lasting presence in the theater of operations.

Equipped with *Battlenet Inside*, it receives all the modern information and communications systems required by a combat crew and for the command of a unit on operations.

Fully certified for mass production, it is currently being manufactured for several export clients.

(Stand F140 and B568, Hall 5A)

VOLVO GROUP GOVERNMENTAL SALES is in charge of Defense, Security activities and Emergency services within the Volvo Group, with the following brands: RENAULT TRUCKS Defense, ACMAT Defense, PANHARD Defense, VOLVO Defense and MACK Defense. VOLVO GROUP GOVERNMENTAL SALES is a leading player in the field of wheeled military and security vehicles.

RENAULT TRUCKS Defense, one of three participants in the Joint Venture (GME) which was awarded the Scorpion contract by the Minister of Defense on 5 December 2014, is to participate in the development of the French Army's new generation of front-line vehicles Griffon and Jaguar. RENAULT TRUCKS Defense is in particular responsible for supplying the powertrains for these two vehicles, and for providing the whole supply chain for the spare parts and components of the Scorpion program.
